WELCOME TO THE FAMILY

**2020**

# WELCOME

This Welcome Pack includes everything you need to make the most of being a Killgerm customer.

**Whether you're completely new to pest control, or you're a long-standing established member of the industry, we would like to give you a very warm welcome. We look forward to working together with you in the future.**

This Welcome Pack includes all the essentials you need to ensure you get the most out of being a valued Killgerm customer, including:

- An introduction to Plus Points, our loyalty scheme just for pest controllers.
- Information about the services we offer, including the waste disposal scheme, training courses, workshops, breakfast meetings, insect identification and technical support.
- Information about the pest control industry, including trade associations, the Campaign for Responsible Rodenticide Use and the National Pest Advisory Panel.
- Useful contacts in Killgerm.

Thank you for choosing Killgerm

Make sure we have your email address so you are the first to hear about product launches, offers and industry updates!

# ABOUT US

**Originally established in 1893, Killgerm is now Europe's largest distributor of public health pesticides. Driven by a high level of involvement and dedication to the pest management industry, Killgerm continues to fully support pest controllers by providing a wide range of innovative products, professional training, technical support, and an active membership of industry bodies.**

Rupert Broome, Killgerm's Managing Director comments, "Killgerm is completely committed to moving the pest management industry forward, as well as developing a wide range of innovative products and exceptional training. We take part in numerous industry initiatives designed to help raise the profile of pest control and its importance within environmental health."

Killgerm took part in the creation of the BPCA Manufacturers Committee, The National Pest Advisory Panel of the Chartered Institute of Environmental Health and The Campaign for Responsible Rodenticide Use (CRRU).

A keen supporter of trade associations, Killgerm has maintained active membership of the British Pest Control Association, the National Pest Technicians Association and many other national associations overseas.

# Need help **Launching** your business to the next level?

## Introduction to pest control course

This course is ideal for anyone who is new to pest control and looking at setting up a successful pest control company. We will cover everything you will need to help you identify your market, tell you what you need to do to get your business up and running, and answer any industry or business related questions you may have.

During the "Introduction to pest control" course, you will learn:

- Types of company – sole trader, Limited etc...
- Training options/requirements
- Setting up considerations – equipment, insurance, vehicle, storage
- Marketing
- Paperwork and administration
- Pricing structures
- Selling a pest control service
- Waste

**And much more...**

Here when  
YOU need us!

# SUBSIDISED WASTE DISPOSAL SCHEME

Waste Paperwork Video

**Killgerm has been operating the scheme to aid customers with the safe and environmentally sound disposal of their work-generated waste for over 20 years now.**

Members of the Killgerm Subsidised Waste Disposal Scheme ("The Scheme") will be fulfilling their legal duty under waste legislation and the 'waste hierarchy' if they adhere to the terms and conditions of the scheme.

Killgerm Chemicals Ltd operates a licenced waste transfer station and is registered as an upper tier waste carrier (CBDU141760). The company holds the relevant environmental permit (EPR/CP3398ZE). The employees running the scheme are fully qualified and hold the relevant certificates of competence in order to manage the activities of the waste and in compliance with the law.

The Scheme will run annually from 1st January until 31st December. The membership fee for all companies or individuals is £200 per annum and includes an individual waste allowance of 100kg per year. Once you have reached your waste allowance a supplemental charge for waste over 100kg will be charged at £2.50 per kg.

Members can dispose of waste under The Scheme which has directly arisen as a result of work undertaken solely by them, and specifically excludes all waste generated by any subcontractors or other 3rd parties.

If members are unable to deliver your waste to the Killgerm waste transfer station directly, Killgerm Chemicals can arrange for it to be collected. The cost of collection will be paid by the member and an individual quote upon request will be provided for each collection.

End-of-life fluorescent tubes from Electronic Fly Killer machines are regulated under the "WEEE" system (The Waste Electrical and Electronic Equipment Regulations 2006). Tubes purchased from Killgerm Group may be returned to the Ossett site for recycling. There is no charge for this service. Tubes will have attracted an environmental charge (to cover the cost of recycling) at the time of purchasing. This will show as "WEEE recycling charge" on invoices.

**For further information please go to:**  
**[www.killgerm.com/waste\\_disposal\\_scheme](http://www.killgerm.com/waste_disposal_scheme)**

The Killgerm Subsidised Waste Disposal Scheme is supported by the following companies:

# LOWER TIER REGISTRATION AS WASTE CARRIER

Due to changes it is now a legal requirement to register as a lower tier waste carrier if you transport any type of waste as part of your business.

You can be fined up to £5000 if you don't register. Registration is usually free if you only transport your own waste.

## CAMPAIGN FOR RESPONSIBLE RODENTICIDE USE (CRRU)

**The rodenticide industry, acting as a whole, has recognised the need to address the concerns surrounding the responsible use of rodenticides and the need to ensure that rodenticides are used correctly and in ways that will minimise the exposure of wildlife.**

**The industry therefore initiated the Campaign for Responsible Rodenticide Use (CRRU).**

Key to the campaign is a code of good practice for the responsible use of rodenticides in rural areas.

Killgerm is a founding member and fully supports CRRU.

**Further information about CRRU and the CRRU code is available from [www.thinkwildlife.org](http://www.thinkwildlife.org)**

# MEET YOUR AREA SALES MANAGERS

Killgerm Area Sales Managers tour the country providing you with local access to our products and services no matter where you are. Killgerm realises how important your custom is and our Area Sales Managers provide a comprehensive range of product training and demonstrations ensuring you get personal, friendly and helpful support and advice at any time.

# TECHNICAL SUPPORT

## INSECT IDENTIFICATION

Killgerm Insect Identification Service provides details of the biology of the pest and helpful advice on any necessary control measures.

Killgerm endeavours to provide a full ID report within 14 working days because we know how important it is to your business to receive this information quickly. Samples can be sent to: Killgerm Identification, Wakefield Road, Ossett, West Yorkshire, WF5 9AJ.

The service is free of charge to existing Killgerm customers (subject to account status).

The service is charged at £50 + VAT to non-customers.

The identification of spiders is not within our area of expertise. Please contact the Natural History Museum ([www.nhm.ac.uk](http://www.nhm.ac.uk)) for spider identifications.

Please email the Technical Team on **[identification@killgerm.com](mailto:identification@killgerm.com)**

for further information or visit **[www.killgerm.com/technical/insect-identification/](http://www.killgerm.com/technical/insect-identification/)** to download the Insect ID form.

## TECHNICAL DEPARTMENT

Our Technical department is hard wired into the company and the industry to serve you with independent and unbiased advice on product selection. This great service helps you to solve technical problems and receive unrivalled professional training.

# KILLGERM PRODUCT DEVELOPMENT

The Product Development department source innovative and creative solutions for the professional pest control industry. They develop new products for Killgerm, ensuring that they are practical, effective and safe for their intended purposes. In addition, the Product Development department undertakes product testing and evaluation to ensure that the selection of products offered by Killgerm meets customer's requirements.

# MEET THE TEAM

Killgerm's highly qualified technical department is the largest of any distributor in Europe. We are committed to supporting you every step of the way- from independent and unbiased advice on product selection to helping to solve technical problems. Just pick up the phone to receive expert help!

# LITERATURE

Killgerm has produced a wide range of technical and product-based literature to support pest controllers. These can be downloaded from the website:

[www.killgerm.com](http://www.killgerm.com)

# WORKSTUDIES

13 informative workstudies, focusing on '**Opportunities for Profit**' are available on the following topics:

- Wasps
- Birds
- Fleas
- Flying Insects
- Bedbugs
- Waste Management
- Flood
- Proofing
- Insect Monitoring
- Ants
- Rodent
- Marketing
- Vertebrates

# Flying the Flag for Pest Control

**We dedicate a significant amount of our income towards promoting and growing the industry through our extensive work with the Chartered Institute of Environmental Health's (CIEH) National Pest Advisory Panel (NPAP).**

The importance of this industry is wide reaching and is integral to ensure public health. Only by promoting this can the industry grow and that is why the NPAP have worked on a series of documents targeted directly at the food, construction, housing and hospitality industries along with promoting the World Health Organizations book on The Significance of Urban Pests on Public Health to parliament and throughout Europe.

**NPAP publications are available to download from [www.urbanpestsbook.com](http://www.urbanpestsbook.com)**

[www.killgerm.com](http://www.killgerm.com)

# TRAINING COURSES

## **The basis of good pest management is knowledge.**

As a pest controller you are faced with the daily task of identifying and assessing existing infestations as well as forecasting likely pest problems and how best to deal with these. With increasing legislation, we all have a 'duty of care' when it comes to the risk to the general public, operators and the environment.

We offer a wide variety of courses for different levels of experience and knowledge:

- Basic Principles of Pest Control
- Refresher Courses
- Practical Courses
- Specialist Courses
- Workshops
- RSPH Qualifications – Level 2 & 3
- CRRU approved courses for rodent control - In line with UK Rodenticide Stewardship Regime Requirements

**For further information please call us on 01924 268445 or go to [www.killgerm.com](http://www.killgerm.com)**

Killgerm has one of the largest and most highly qualified technical support departments of any distribution company in Europe.

# POINTS OF REFERENCE

**There are many active organisations which exist within the pest management industry to support you and the work you do...**

Use biocides safely. Always read the label and product  
information before use.

### Key features:

- High quality steel bait station.
- Robust one-piece removable plastic liner accommodates all bait formulations - pasta, loose grain, blocks, liquid bait, as well as snap traps including Snap-e and Trapper T-Rex.
- Four metal rods supplied with each box can be used in both horizontal and vertical positions.
- Top key entry with hinged lid provides quick and easy servicing.
- Available in black or green and powder coated in a very high-quality, matt finish.
- Raised entrance holes and ramps on the robust one-piece liner help to keep the box weatherproof.
- Corporate printing available.
- Compatible with the AF® Ground Anchor for use on soft ground.
